

## CLEANING AND MAINTENANCE

### Cleaning after laying:

We suggest a good initial cleaning after the laying on the floor or wall, this is very important for removing residual grouting and the normal dirt coming from the building works.

We suggest the use of our product **FILADETERDEK**, that is a lightly acid product that doesn't emit fumes that are harmful for the user and that can attack joints.

In case of material layed with epoxy or resinous grouting, we recommend to clean after laying with our specific detergent **FILACR10**.

### Regular maintenance:

For a good cleaning of the floor we suggest the use of our product **FILACLEANER** it's a natural detergent with a high cleaning power.

In case of strong dirty and encrusted by the time, we recommend to consult the following scheme to find the perfect solution to every situation.

<i>Type of dirty</i>	<i>Das richtige Product</i>
Zement, Kalkstein, metal tracer, rust	<b>DETERDEK</b>
Residuals, stains and halos of epoxy joints	<b>FILACR10</b>
Greasy, drinks, food, tire marks, colours, marker, etc.	<b>FILAPS87</b>
Graffiti	<b>FILANOPAINT STAR</b>
Wax candel, bitumen, adhesive tape residues.	<b>FILASOLV</b>
